Portfolio: aykhandadashov.com

Summary

I'm a Software Developer focused on Front-End and Mobile Development, passionate about building smooth and visually appealing user experiences. Lately, I've been creating cross-platform mobile apps and exploring AI integration to add smart features like personalization and automation. I enjoy experimenting with new technologies to turn creative ideas into real projects.

Work Experience

BonApp — **Riga, Latvia**
Front-End Developer — *Dec 2024 – Jul 2025*

- Collaborated on building scalable web applications using React, ensuring responsiveness and performance optimization.
- Implemented state management with Redux to maintain predictable and efficient UI workflows.
- Adopted Monorepo architecture to unify codebases and streamline development across multiple projects.
- Designed wireframes and prototypes for a large-scale project using Figma, facilitating clear communication between design and development teams.

Webzool — **Los Angeles, CA**
Front-End Developer (Remote) — *June 2022 – Jul 2024*

- Developed responsive web apps with Next.js and React.js, integrating MobX/Redux for state management and optimizing UX.
- Enhanced Search Engine Optimization scores for mobile and desktop by 60% through efficient use of Next.js server-side rendering and optimization techniques.
- Designed and implemented interactive mini-games, improving user engagement.
- Automated workflows by implementing CI/CD pipelines using GitHub Actions, increasing deployment efficiency.

Jeyhun Imanov Studio — **Baku, Azerbaijan**
Python Developer — *Jul – Nov 2021*

- Developed web parsers using Python and libraries like BeautifulSoup, Selenium, and Flask.
- Contributed to both front-end and back-end development, integrating HTML, CSS, JavaScript, and Python.

Azercosmos — **Baku, Azerbaijan**
ML Engineering Intern — *Jul – Aug 2021*

- Gained hands-on experience in machine learning engineering and Python frameworks such as TensorFlow.

Technical Skills

Programming Languages: JavaScript, TypeScript, C#, Python
Frontend Development: React.js, Next.js, Vue.js, Nuxt.js
Backend Development: Node.js, .NET
UI/UX Design: Wireframing, Figma, Ant Design, Tailwind CSS, Material-UI, SASS/SCSS
State Management: Redux, MobX
DevOps & Cloud: Azure DevOps, CI/CD Pipelines, Docker, GitHub Actions
Development Tools: Visual Studio Code, Git, Postman, Vite, Bash/Shell (Linux)

Education

Riga Technical University
Bachelor of Science in Computer Science — *Sept 2023 – June 2024*
(Completed 2 semesters before transferring to ISMA)

ISMA (University of Applied Sciences)
Bachelor of Science in Information Systems — *Sept 2024 – Current*

Certifications & Programs

Full-Stack Web Development Certificate — *Sept 2019 – April 2020*
Code Academy – Baku, Azerbaijan

Web Development Bootcamp — *Completed: July 2025*
Magebit – Riga, Latvia

- Built a fully functional e-commerce website using Laravel (PHP), incorporating industry best practices.
- Project received 1st place for **Best Overall Project**.

Innovate Mobility Summer School — *July 2025*
Budapest University of Technology and Economics, in collaboration with Kimitisik

- Collaborated with an international team to develop a startup pitch aimed at solving challenges in smart mobility and urban transport.
- Co-developed ”Hitcher” – a smart mobility startup concept focusing on urban transport efficiency and safety.
- **Project Website:** https://hitcher.it.com

Language Skills

Azerbaijani – Native
English – Fluent
Russian – Native
Turkish – Fluent
TOEFL iBT Score: 93/120 — *(Date: Aug 2019)*
